1. Objective

The purpose of this Chargeback Manual is to establish a clear and standardized framework of guidelines, responsibilities and procedures that Affiliated Merchants must observe when receiving a chargeback, in order to ensure adequate management of the process through timely responses, ensuring the mitigation of the financial and operational impact associated with this type of dispute.

2. Scope

This document applies to all affiliated Merchant that operate with electronic means of payment associated with credit, debit and/or prepaid cards through ProntoPaga, regardless of the sales channel, type of transaction or volume processed.

The Manual regulates the entire chargeback management process, comprising all its stages, from the initial notification of the dispute to the final resolution of the case, including, but not limited to, the collection and delivery of evidence, response times, interaction with ProntoPaga, and the financial consequences arising from the outcome of the chargeback.

In addition, the scope of this Manual extends to all disputes initiated under the regulations of the card networks (such as Visa, Mastercard, American Express or others that may be applicable) and applies without prejudice to the contractual obligations in force between the Merchant and ProntoPaga, which will prevail in the event of a discrepancy.

3. Definitions

- **Acquirer:** An authorized institution that affiliates merchants to card networks and processes payment transactions.

- **Cardholder:** Holder of a credit, debit or prepaid card, who makes a transaction with the merchant and who, eventually, may initiate a dispute regarding said transaction before its Issuer.

- **User:** Customer who registers in a Merchant, it is not necessary to be the cardholder.

- **Affiliated Merchant (Merchant):** Natural or legal person that maintains a current contractual relationship with ProntoPaga and that accepts electronic payments by cards, being responsible for the correct execution of transactions and their defense against possible chargebacks.

- **Chargeback:** Request for reversal of a charge that a Customer makes to its Issuer, requesting the refund of a payment made exclusively by card (other payment methods are not covered by chargebacks) since it considers the transaction fraudulent, erroneous (duplicate charge, incorrect amount) or unauthorized (did not receive product/service or it is not what was agreed), etc. The most common types of chargebacks are:
    - Without Cardholder Authorization
    - Other Fraud, Card-Away Environment
    - Defective cardholder dispute
    - Merchandise / Services Not Provided

- **Issuer**: Bank or financial institution that issues the card to the customer, manages the relationship with the cardholder, and initially receives complaints or disputes about transactions.

- **Evidence**: A set of verifiable documents, records, and background information that support the validity of a transaction, such as proof of authorization, authentication, proof of delivery, acceptance of terms and conditions, technical logs, or others required by the card network depending on the reason for the chargeback.

- **Won**: Result of a chargeback in which the merchant successfully defends the transaction, either because the issuer or the card network accepts the evidence presented and determines that the purchase was valid. In this case, no withholding is made to the Merchant.

- **Lost**: The result of a chargeback in which the merchant fails to prove the validity of the transaction, or the evidence presented is insufficient, untimely or invalid according to the applicable rules. In this case, the amount of the chargeback and associated costs are debited or withheld from the merchant.

- **Pending**: Status of the chargeback in which the evidence has already been sent to the acquirer and/or the card network and is awaiting a final resolution by the Issuer or the Brand.

- **Pre-Arbitration**: A post-representation stage, initiated by the Issuer or Acquirer, in which the dispute is reopened following a chargeback reversal, usually due to the submission of new background or additional arguments by the cardholder or issuer.

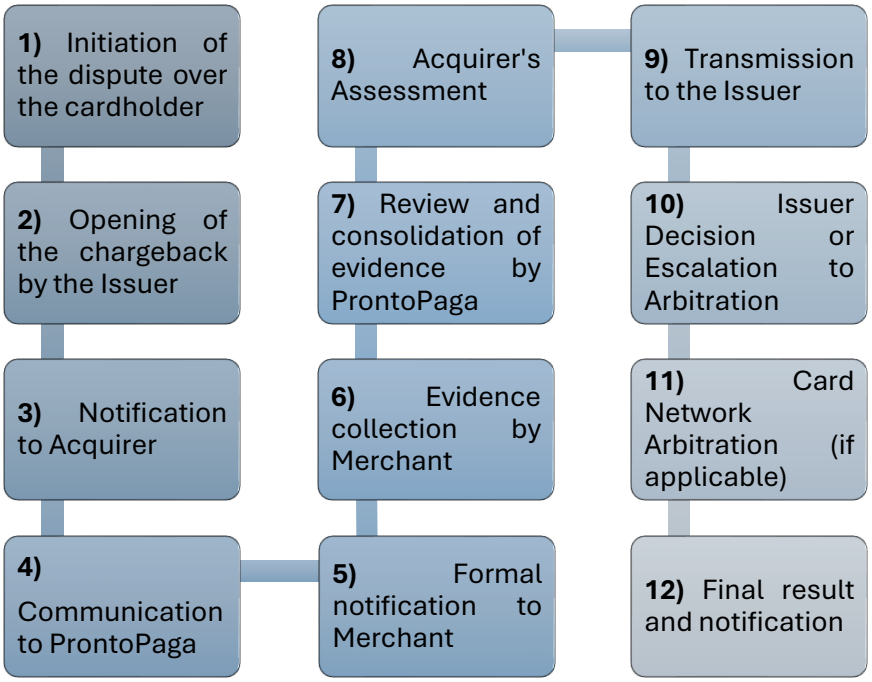

- **Reason code:** standardized code that indicates the specific reason for an event or problem within a process, that is, it explains why the customer or the bank rejected or disputed a transaction.

- **Representment:** The process by which the merchant, through ProntoPaga and the Acquirer, presents evidence to formally dispute a chargeback. The objective is to show that the transaction is valid according to the card network's rules.

- **Brand Network / Card Network**: A system and set of operating rules administered by international card brands (e.g., Visa, Mastercard, American Express, among others), that channel transactions and disputes, define chargeback procedures, and, in the event of arbitration, determine final liability.

4. Description of the Chargeback Procedure

The chargeback procedure is summarized in the following 12 stages:

1. **Initiation of the dispute over the cardholder**

   The cardholder files a complaint with their Issuer (whether banking or non-banking), disputing a specific transaction (e.g., fraud, non-recognition, service not received, etc.).

2. **Opening of the chargeback by the Issuer**

   The Issuer preliminarily analyzes the claim and, if deemed appropriate, formally initiates the chargeback through the network of the corresponding brand (Visa, Mastercard, AMEX, among others), assigning a specific reason code.

3. **Notification to Acquirer**

   The brand's network transmits the chargeback to the Acquiring Bank, informing them about the transaction, its date, time, amount and the *Reason Code*.

4. **Communication to ProntoPaga**

   The Acquirer informs ProntoPaga of the chargeback so that it can carry out the process of collecting evidence with the Merchant.

5. **Formal Notification to Merchant**

   ProntoPaga notifies the Merchant of the existence of the chargeback, indicating the reason and the amount.

6. **Evidence collection by Merchant**

   The Merchant gathers and delivers to ProntoPaga the documentation that supports the legitimacy of the transaction (for example: proof of authorization, authentication, proof of delivery, accepted terms, logs, etc.).

7. **Review and consolidation of evidence by ProntoPaga**

   ProntoPaga reviews the evidence received, validates its formal consistency and sends it to the Acquirer within the deadlines established by the card network.

8. **Acquirer's Assessment**

   The Acquirer analyzes the documentation submitted. If the evidence meets the required standards, formally submit it to the card network in response to the chargeback (*representment*).

9. **Transmission to the Issuer**

   The card network transmits the response and evidence to the Issuer, who re-evaluates the case considering the information provided by the Merchant.

10. **Issuer Decision or Escalation to Arbitration**

    The Issuer may:

    - Accept the evidence and reverse the chargeback, or
    - Reject it and escalate the case to arbitration against the brand, when the regulatory framework allows it.

11. **Card Network Arbitration (if applicable)**

The Brand, analyzing the background information presented by both parties, determines the final responsibility for the transaction.

12. Final result and notification

The Acquirer informs the final result to ProntoPaga, which in turn will upload it to the ProntoPaga portal indicating:

- Won Chargeback: no withholding or definitive charge is made to the Merchant.
- Lost Chargeback: The amount of the chargeback and associated costs are debited or withheld from the Merchant in accordance with the applicable contract.

5. Roles and Responsibilities

5.1. Deadlines under which the Merchant is governed

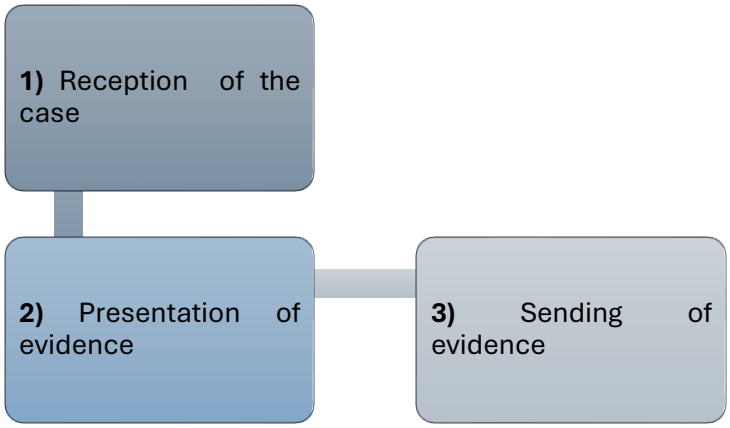

A) The cardholder will have the following deadlines from the time the transaction originates to submit their dispute to the Issuer:

Country	Cardholder term	Comments
Chile	120 days (Visa/Mastercard)	Counted from the date of the transaction
Ecuador	120 days (Visa/Mastercard)	Counted from the date of the transaction
Peru	120 days (Visa/Mastercard)	Counted from the date of the transaction
Argentina	120 days (Visa/Mastercard)	Counted from the date of the transaction
Mexico	90 days	Counted from the date of the transaction

B) From the time ProntoPaga notifies the Merchant, it will have the following deadlines to attach the requested evidence:

Country	Deadlines for submitting evidence	Comments
Chile	5 business days	Counted from receipt of the email
Ecuador	3 business days	Counted from receipt of the email
Peru	3 business days	Counted from receipt of the email
Argentina	3 business days	Counted from receipt of the email
Mexico	3 business days	Counted from receipt of the email

5.2. Specifications regarding the roles and responsibilities of the Merchant during the chargeback procedure.

1. Reception of the case

The notification of a chargeback will be sent by ProntoPaga via email from box **chargeback@prontopaga.com**, indicating the date, the amount and reason (*reason code*).

From the receipt of such notification, the Merchant must immediately activate its internal processes, designating a person responsible for the collection and sending of the required information within the established deadlines.

2. Presentation of evidence

The Merchant must gather and submit sufficient, verifiable and coherent documentation to support the validity of the transaction questioned, in accordance with the standards required by the card networks and the Acquirer.

As a mandatory minimum, the evidence submitted must include legible, complete screenshots obtained directly from the Merchant's systems, containing the following information:

- Date of registration of the user and registered address, with visual support.
- Service ID or Transaction ID, clearly indicating the date and amount of the chargeback.
- User data and KYC verification process, with evidence of the result of said verification.
- Identity document (ID card or other valid identifier) that allows the user's identity to be validated.
- IP and geolocation records, associated with the questioned transaction.
- Result of the operation or bet, including information that allows determining whether there were winnings or losses and the amounts involved.
- Express acceptance of the terms and conditions by the user, with evidence of date, time and mechanism of acceptance.

The complete, consistent and timely delivery of this information is the sole responsibility of the Merchant and is essential to:

- Increase the odds of success in the defense of the chargeback,
- Comply with regulatory deadlines imposed by card brands, and
- Avoid automatic rejections due to insufficient, incomplete, or untimely evidence.

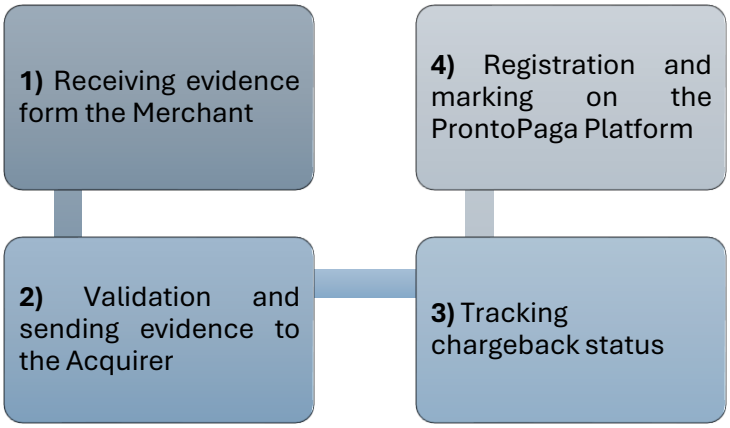

3. Uploading or sending evidence

The Merchant must upload all the supporting documentation in a single file in PDF format, through the ProntoPaga Platform, ensuring that the evidence is clear, orderly and easily verifiable.

In the event that the Merchant does not have access to the ProntoPaga portal, the evidence must be sent within the indicated period, responding in the same email where the Chargeback was informed (email chargeback@prontopaga.com).

Failure to comply with deadlines or the delivery of incomplete evidence may result in the loss of the chargeback, with the consequent withholding or charge of the disputed amount to the Merchant, in accordance with the contractual terms in force.

5.3. **Specifications regarding ProntoPaga's roles and responsibilities during the chargeback procedure.**

ProntoPaga acts as an operational facilitator and coordination point between the Merchant, the Acquirer and the card networks, without prejudice to the fact that the final resolution of chargebacks corresponds to the Issuers and/or the brands, in accordance with their respective regulations. In this context, these are the 3 roles that ProntoPaga plays:

1. **Receiving Evidence from the Merchant**

ProntoPaga is responsible for receiving the evidence sent by the Merchants, either through the ProntoPaga Platform or through the email channel enabled for the management of chargebacks.

Once the information is received, ProntoPaga will carry out a preliminary verification of its completeness and formal consistency, without implying a substantive validation or a guarantee on the result of the chargeback.

2. Validation and sending of evidence to the Acquirer

ProntoPaga will check that the documentation provided by the Merchant:

- is within the established deadlines,
- corresponds to the notified chargeback, and
- complies, in formal terms, with the minimum requirements demanded by the Acquirer and the card network.

Once this review is completed, ProntoPaga will send the evidence to the corresponding Acquirer, acting as a transmission channel between the Merchant and the payment ecosystem.

ProntoPaga does not modify, alter or complement the evidence provided by the Merchant, the latter being solely responsible for the veracity, sufficiency and quality of the information provided.

3. Tracking chargeback status

ProntoPaga will carry out the operational follow-up of the chargeback before the Acquirer, in order to know the status of the process and its eventual resolution.

Such monitoring includes obtaining information regarding:

- Won Chargebacks,
- Lost Chargebacks, and
- Chargebacks pending resolution.

The foregoing, without prejudice to the fact that the deadlines and decisions depend exclusively on the Issuer and/or the card network, in accordance with its operating rules.

4. Registration and marking on the ProntoPaga Platform

Once the result of the chargeback has been received from the Acquirer, ProntoPaga will proceed to update the status of the case on its platform, classifying it as:

- Won,
- Lost, or
- Pending, as applicable.

This marking is for informational, operational and internal control purposes, and allows the Merchant to access the updated status of its chargebacks, without such registration constituting an autonomous determination of liability on the part of ProntoPaga.

ANNEX I

CHARGING FOR CHARGEBACK SERVICES

Chargeback management comprises the set of administrative, operational, and coordination activities that must be performed for the processing of disputes associated with transactions carried out by Merchants, including, but not limited to, receiving notifications, collecting and sending evidence, monitoring the case, and communicating the outcome.

1. Nature of the charge

The chargeback management fee corresponds to the charge that may be applied by ProntoPaga and/or by the Acquirer, in view of the operational costs involved in the administration and processing of disputes or chargebacks initiated on Merchant transactions.

Such collection is independent of the final result of the chargeback and may be applied in both won and lost cases, unless the commercial contract expressly provides otherwise.

2. Applicability of the charge

The application of the charge for the management of chargebacks will be governed by the provisions of the current contract signed between Merchant and ProntoPaga.

In particular:

- If the contract expressly establishes a charge for chargeback management services, such charge will be applied in accordance with the conditions, amounts and periodicity defined therein.
- In those cases, in which the contract does not detail a specific value but contemplates clauses such as "the costs associated with chargeback dispute processes will be assumed by the Merchant", ProntoPaga may apply the corresponding charges, according to the costs effectively incurred.

3. Communication and payment details

ProntoPaga will inform the Merchant of the details of the transactions affected by chargebacks and the charges associated with the management, indicating where applicable:

- identification of the transaction,
- Chargeback status (won, lost, or pending), and
- amount of the charge applied for administrative management.

Such information will be made available to the Merchant through the defined channels, without prejudice to the invoicing or settlement mechanisms established contractually.

4. Final considerations

The charge for the management of chargebacks does not constitute a penalty, but an operational charge associated with the administration of the process, in accordance with the standards of the payment ecosystem and the contractual obligations assumed by the Merchant.

ANNEX II

BEST PRACTICES TO AVOID CHARGEBACKS

The implementation of good operational and commercial practices is key to reducing the occurrence of chargebacks, improving customer experience and maintaining an adequate risk profile before the card networks, the acquirer and ProntoPaga.

Below are a series of recommendations that Merchants should consider as part of their regular management.

1. Permanent transaction monitoring

The Merchant must continuously monitor the transactions processed, timely identifying unusual behavior, suspicious patterns, or activities that deviate from the usual behavior of its customers.

This monitoring allows you to detect possible fraud events, operational errors or misuses, and adopt preventive measures before they lead to chargebacks.

2. Clear and transparent information to the customer

It is essential that the Merchant provides the customer with clear, accessible and visible information, including, but not limited to:

- recognizable payment descriptors,
- return, cancellation and refund policies,
- terms and conditions clearly stated and accepted by the user.

Transparent communication significantly reduces chargebacks for non-recognition, charge confusion, or disagreements.

3. Timely and disciplined chargeback management

Upon notification of a chargeback, the Merchant must respond promptly, collecting and sending the required evidence within the strict deadlines established by the card networks.

Failure to meet deadlines, even if the transaction is legitimate, substantially increases the risk of loss the chargeback.

4. Periodic analysis of causes and continuous improvement

The Merchant must regularly analyze the causes of the chargebacks received, in order to identify trends, operational weaknesses or failures in internal processes.

Based on this analysis, it is recommended to implement corrective and preventive actions, such as adjustments in validation processes, improvements in communication with customers or reinforcements in risk controls.

5. Information custody and traceability

Maintaining complete, orderly, and easily traceable records of transactions, users, and customer communications facilitates effective defense against potential chargebacks and improves the Merchant's responsiveness.

The systematic adoption of these good practices contributes to reducing the frequency and severity of chargebacks, strengthening the operational continuity of the Merchant and its relationship with ProntoPaga and the payment ecosystem.

ANNEX III

CONSEQUENCES OF CHARGEBACKS

The following are the main consequences that chargebacks imply for Merchants:

- Loss of money and commissions.
- Penalties by Acquirers, which may include mitigation plans, operational restrictions and, in repeated or high-risk cases, termination of the contract and closure of the Merchant.
- Possible suspension of the Merchant account.
- Difficulty in maintaining relationships with international banks and processors. Risk of alerts from card brands if there is a high incidence.

ANNEX IV

SUPPORT AND ESCALATION CHANNELS

In order to ensure timely, orderly and traceable management of chargebacks, ProntoPaga makes available to Merchants the following support channels, which must be used in accordance with the instructions of this Manual:

1. Chargeback Support Email

A) Channel: chargeback@prontopaga.com
Use: sending evidence in those cases in which the Merchant does not have access to the enabled portal.

B) Channel : support@prontopaga.com
Use: inquiries, requests, requests associated with chargebacks

2. Evidence Portal

Channel: ProntoPaga Backoffice

Use: Uploading, tracking, and managing evidence associated with chargebacks. This channel is the preferred means for sending supporting documentation.

3. Hours of Operation

Business Days: Monday to Friday

Hours: 09:00 to 18:00 hours

Time zone: Chile (GMT-3 or GMT-4, as applicable)

Communications and shipments made outside of business hours will be processed the next business day, without suspending or extending the regulatory deadlines established by the card networks.

ANNEX V: Frequently Asked Questions (FAQs)

1. **What happens if the evidence is not sent within the established deadline?**

If the Acquirer does not receive the evidence within the period defined by the card network, the chargeback may be considered automatically lost. In this case, the amount of the transaction is reverted to the cardholder and there is no possibility of subsequent appeal.

Additionally, as it is a lost chargeback, the corresponding amount is debited or withheld from the Merchant, in accordance with the contractual conditions of ProntoPaga.

2. **What impact do chargebacks have on a Merchant?**

A high volume or a significant rate of chargebacks can negatively affect the Merchant's risk profile. This may result in special monitoring, mitigation plan requirements, operational restrictions and, in repeated or high-impact cases, in the termination of the contract with the Merchant, in accordance with the policies of the Acquirer, ProntoPaga and the card networks.

3. **What does it mean to generate a negative pattern in the face of brands?**

A negative pattern occurs when a Merchant maintains recurring rates of chargebacks, especially those that do not have sufficient evidence or are not disputed.

This behavior can lead to the inclusion of the Merchant in trademark monitoring programs, which implies greater operational requirements, additional controls and eventual sanctions.

4. **What happens if a Merchant exceeds the permitted limits?**

If the Merchant exceeds the chargeback thresholds defined by the brands or the Acquirer, it may be subject to corrective actions, such as:

- intensive monitoring,
- mandatory implementation of improvement plans, and
- Operational restrictions.

If the breach persists, the situation may lead to the termination of the contract and closure of the Merchant.

5. What happens if I don't have evidence to attach?

In the absence of evidence, it is not possible to prove the validity of the transaction or the correct provision of the product or service, which usually leads to the loss of the chargeback.

A high or sustained volume of unbacked chargebacks can generate a negative pattern in the face of card networks (Visa, Mastercard, American Express, among others) and lead to monitoring processes, risk mitigation plans, operational restrictions and, in repeated or serious cases, in the termination of the contract and closure of the Merchant.

It is essential, in these cases, to inform ProntoPaga in a timely manner about the situation.

6. What should I do if the User acknowledges the purchase after the chargeback has been initiated?

If the customer acknowledges the transaction after the chargeback is opened, they must contact their Issuer directly to request the reversal of the claim.

The Merchant must also inform ProntoPaga, so that it can carry out the corresponding follow-up with the Acquirer.

7. Can a Merchant appeal the result of a lost chargeback?

As a general rule, decisions issued by the Issuer or the card network are final.

However, if a management error is detected or new relevant evidence is available, the Merchant may request an internal review from ProntoPaga, in order to evaluate the feasibility of additional management before the Acquirer.

It should be noted that this type of management may involve additional costs, which must be assumed by the Merchant.

8. Are there any costs associated with chargebacks?

Yes. Depending on the provisions of the current commercial contract, ProntoPaga may apply administrative fees or chargeback management charges, even when the result is favorable to the Merchant.

The applicable amounts and conditions are defined in the contract signed by the Merchant.
